

High-flow pressure washer for tough routine work

The high power premium class line - combining high pressure and high water flow levels for routine cleaning in agriculture, transport or food industries. The MC 8P is a machine with high water flow - quick to install, easy to move around and comfortable to use. Pressure levels of up to 180 bar and high water flow up to 2500 l/h depending on the model mean that even ingrained and resistant dirt can be cut away or loose dirt can be flushed in high quantities. Working time can be reduced significantly, bringing cleaning costs down.

- Tough steel or stainless steel frame variants
- Slow running 1450 rpm motors with low noise level
- Ceramic pistons for longer working life
- Simple and easy to use
- Parking brake
- 15 m HP hose
